## COMPANY OVERVIEW

SPECIALTY LUBRICATION & RELIABILITY SOLUTIONS

We supply the specialty lubricants and maintenance chemicals  
that keep Saudi industry running — and the engineering  
support that makes them work.

# A specialty lubrication company

Endorsed by Iron Stake

**Lubrenza supplies advanced lubrication, maintenance chemicals and reliability solutions that improve equipment performance, extend service life and reduce operating cost.**

We are not a general oil distributor. We work in the specialty grades that ordinary suppliers cannot support, across four capability areas and eight industries, and we back every supply relationship with engineering support rather than a price list.

## POSITIONING

**An engineering-led specialty lubrication brand for Saudi industry.**

## BRAND PROMISE

**Protect equipment. Optimize performance. Deliver value.**

## ENDORSEMENT

**LUBRENZA by Iron Stake — an established parent company behind a focused brand.**

## WHO WE SERVE

**Maintenance, reliability, engineering and procurement teams.**

## AUTHORISED DISTRIBUTION

**Contracted distributor for TotalEnergies, Petromin and ADNOC**

Distribution agreements in place — secured supply and product availability behind a specialist technical service.

## Four capability areas

The structure of the business

### Marine lubrication

Cylinder, system and stern tube oils for vessels and offshore assets, with corrosion protection for topside and coastal equipment. Supported at Red Sea and Gulf ports.

### Gear & industrial oils

Gear oils, bearing greases, compressor and hydraulic fluids for plants, mills, crushers, kilns and heavy rotating equipment across every industry we serve.

### Food-grade lubricants

NSF H1 registered oils and greases for food, beverage and pharmaceutical production, supplied with the certification documentation your auditors require.

### Specialty & maintenance chemicals

Open-gear compounds, wire-rope dressings, metalworking fluids, anti-seize pastes, corrosion protection and cleaning chemicals for the whole maintenance function.

## TYPICAL EQUIPMENT WE LOOK AFTER

- Gearboxes and reducers
- Compressors and blowers
- Marine main and auxiliary engines
- Filling and packaging lines
- Ball and SAG mills
- Hydraulic systems
- Deck cranes and wire ropes
- Pumps and fans
- Crushers and screens
- Conveyor systems
- Kilns and dryers
- Turbines

## More than a delivery

What a Lubrenza relationship looks like

01

### We survey

Our engineers walk your plant or vessel and record every lubrication point — machine, grade, quantity and interval.

02

### We simplify

Most sites carry far more lubricant types than they need. We reduce the list, cutting stock, storage risk and misapplication.

03

### We supply

The correct specialty grade for each point, in the right pack size, with full technical and safety documentation.

04

### We monitor

Scheduled oil sampling and laboratory analysis, so wear and contamination are caught long before a failure.

05

### We report

A clear quarterly report showing consumption, condition and what the programme has saved you.

#### WHAT MAKES US DIFFERENT

- Engineering-led, not trading-led — our people come from maintenance and reliability.
- Full documentation — technical data sheets and safety data sheets in Arabic and English.
- Backed by IRONBES — an established parent company behind a focused new brand.
- Measured on your uptime, not on our tonnage.

# LUBRENZA®

SPECIALTY LUBRICATION &  
RELIABILITY SOLUTIONS

ENGINEERED FOR RELIABILITY.

## Let us look at one line, or one vessel.

No obligation. Our engineers will survey a single production line or a single asset and show you, in writing, what it is costing you today and what it would cost done properly.
